# SOLID PODS

## EXPLORING THE TECHNOLOGY

Alexandre S, Guilherme H & Bastien S

# THE CONTEXT

The World Wide Web was invented in 1989 by Tim Berners-Lee. 35 years later, its creator considers it to have a lot of problems. Solid is here to solve them.
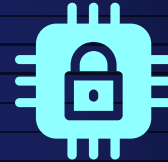

# THE SOLID TECHNOLOGY
## GIVES THE USERS

**Control of their data**

Changing data would be simpler (e.g. Changing address everywhere at once)
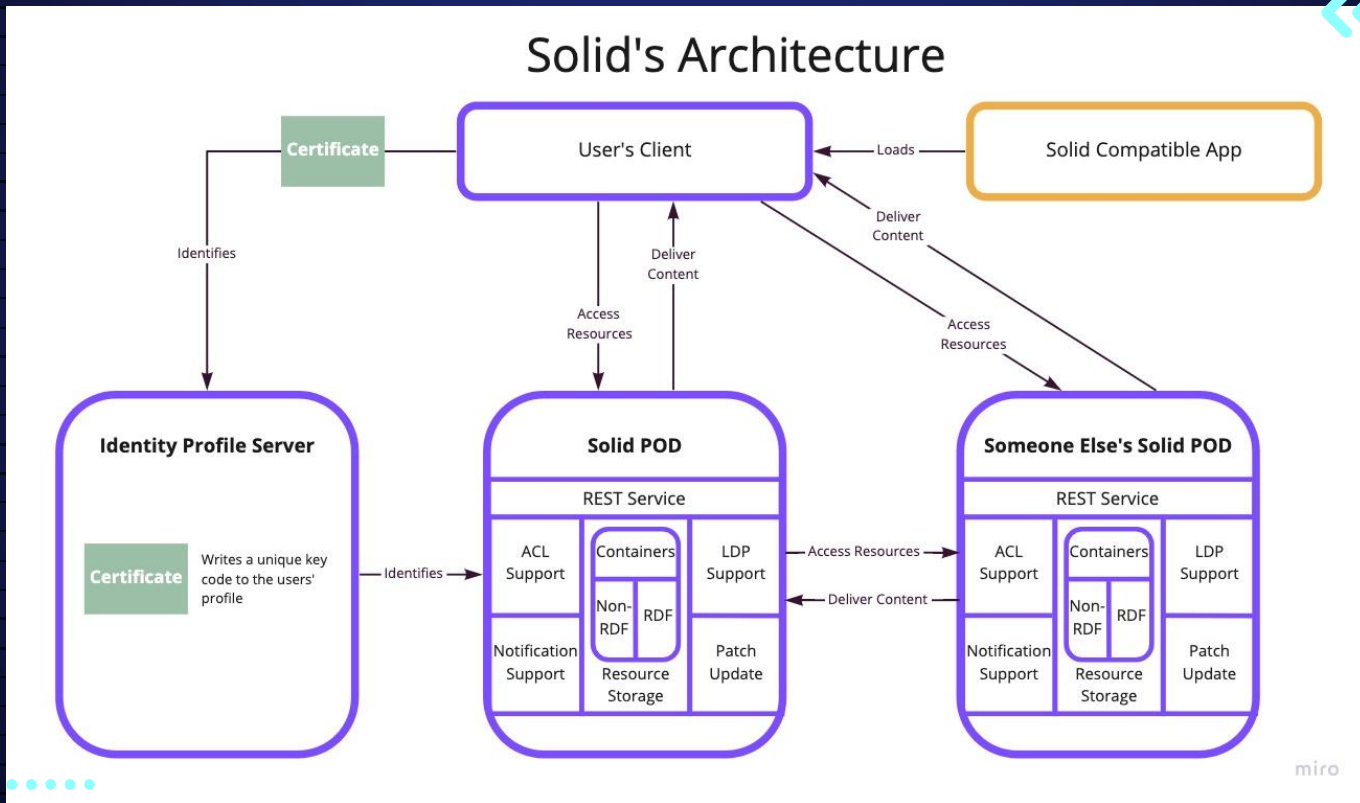

**Control of their Privacy**

Ability to choose exactly the information you want to share with websites

**A better Security**

All data being in one place only induces less risk of leaks
# HOW IT WORKS

Solid's Architecture

# CONCRETE APPLICATION

PERSONAL PART
